Profile

Enthusiastic and motivated web developer with foundational skills in JavaScript, TypeScript, React, and Node.js. I have a background in software testing, website administration and finance. Eager to apply my skills and grow professionally in an entry-level position within a dynamic tech team.

Tech projects

- CatQuest (catquest.netlify.app)
  (React + TypeScript, CSS, HTML, API, responsive design)
  SPA about cats. It helps to find breeds according to the characteristics selected by the user, shows information about breeds and tell different facts about cats.

- On-line dictionary app
  (dictionary-with-photos.netlify.app)
  (React.js, CSS, HTML, API, Bootstrap, responsive design)
  The app shows meanings, phonetics and synonyms of English words. It use free Dictionary API for word searching and free API of images collection to show photos for searching word

- Weather app (online-weather-react.netlify.app)
  (React.js, CSS, HTML, API, Bootstrap, responsive design)
  The app shows weather conditions in any part of the world in present moment and 5 days weather forecast. Use API technology from OpenWeather and free Animated weather icons
